

Memory Care

at Cambridge Place

CAMBRIDGE PLACE

SENIOR CARE

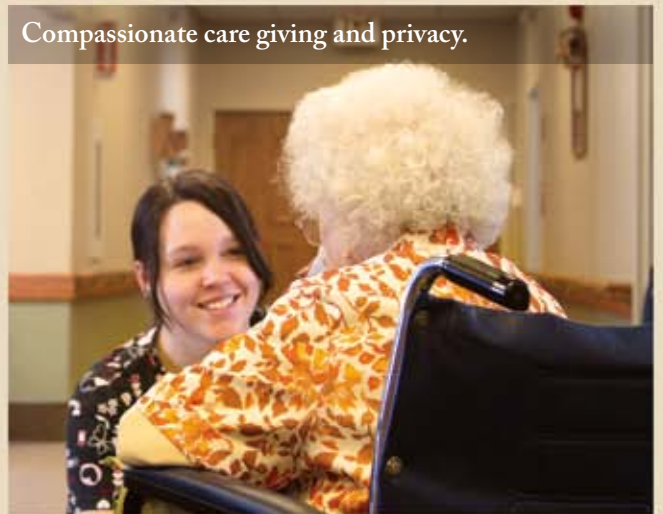

An engaging home-like environment helps maintain a meaningful life.

Activities that promote self-esteem and brain wellness.

Compassionate care giving and privacy.

Special Care for Very Special Residents

Experience counts. Cambridge Place was the first facility in the multi-county area to provide specialty care for dementia and Alzheimer's disease. Cambridge Place has a specifically designed wing that enables us to provide a home-like, safe and secure setting for persons having dementia or Alzheimer's disease. Our goal is to help these residents function at their highest possible level, remaining active and productive for as long as they are able.

Cambridge Place serves its residents holistically, with appropriate medical care and support; a home-like, secure and comfortable physical environment; an engaging social environment; and caregiving that supports these individuals' special needs for compassion and privacy. Our care helps residents achieve a meaningful life as the disease progresses.

The Cambridge Place care model is administered by a management team, caregivers and medical professionals who are skilled in the latest dementia caregiving techniques. Over time, we often become part of the resident's extended family. This gives us a personal stake in our residents' well-being and is the reason we created a home-like care facility that is personal, warm and inviting.

Our years of experience plus our home-like environment make Cambridge Place the superior memory care facility in Marshall County.

The best way to know how we at Cambridge Place help residents and families deal with dementia and Alzheimer's disease is to visit us in person. See how our years of experience can make a difference in the quality of life of your loved one. To schedule a visit, contact our administrator at 785.562.5321.

CAMBRIDGE PLACE
SENIOR CARE

Medical care

All residents have an individualized care plan and care team.

Each resident's personal physician is part of the care team. On-site physician visits are encouraged.

Care plans are assessed routinely so that changes in care and social activities are made for each phase of the disease.

Family members participate in the planning of care for their loved one.

Innovative, resident-centered care

Experienced caregivers are professionally trained and skilled in techniques to deal with dementia and Alzheimer's disease behaviors.

Healthy social environment

Residents enjoy activities that promote self-esteem and self-worth including music, art, home chores, exercise, sensory hobbies and church services.

Home-like living

Secure, comfortable rooms made familiar with personal items from home.

Small, private dining room with a secure outside courtyard.

On-site beauty salon, barbershop and therapy room.

Physical, occupational and speech/communication therapies are available on-site as directed by the resident's physician.

Support for families

Community Alzheimer's support group meets monthly on-site.

Adult Day Care and Respite Care are also available.

Social services counseling is available to help families deal with the impact of the disease.

Transportation available

Escorted service to specialty physician clinics.

Facility-sponsored van rides and outings.
